CMAS PROCUREMENT

Contract Description

The California Multiple Award Schedules (CMAS) are established for information technology and non-information technology products and services that have been competitively assessed, negotiated, or bid primarily by the federal General Services Administration, but not exclusively. The contracts are structured to comply with California procurement codes, guidelines, and policies, and provide for the highest level of contractual protection.

Public Contract Code (PCC) Sections 10290 et seq. and 12101.5 include approval for local government agencies to use CMAS for acquisition of information technology and non-information technology products and services. PCC Sections 10298 and 10299 authorizes local government agencies and school districts to use CMAS and other Department of General Services agreements without competitive bidding. A local government agency is any city, county, city and county, district, or other local government body or corporation, including the California State Universities (CSU) and University of California (UC) systems, K-12 schools and community colleges empowered to extend public funds.
