

## **Proposal to retrofit parking machines with credit card acceptor**

Currently LPC campus has 10 parking machines that only accept cash for daily parking permits.

The attached proposal includes all hardware, installation and programming to retrofit the 10 parking machines to add the payment option of a credit/debit card.

### **Installing the credit/debit card option would:**

Increase accounting and accuracy

- Reduce in cash counting
- Provide real time accounting

Better customer service

- Two payment options (cash or Credit/Debit card)

Less maintenance of machines

- Decrease intake and processing of cash/coins

Increase in revenue

- Two payment options
- Increases the compliance with parking requirement

To offset the credit card and cellular data usage fees there is an available option to add a .25 cent charge that could be applied to all credit card transactions.
