2021/10/08 Meeting - Copy

2021/11/19 Meeting

By: Bill Komanetsky

Vaccine mandate software

```
- Thousands of vacination records from students
- This does not apply to on-line only students - Campus only
- Product is Cleared-for.  Cloud hosted, HIPA compliant.  Allows for
students to upload document (picture of QR code or vaccine card), when
approved, goes into Banner.
- As of 2021/11/19: 40,000 students from last three terms.  Currently 146
records being reviewed.  Authorized 4,226 students to date.
- Communication between Clear-Four and student is a unique URL.
Personalized to each student.  Link sent to their Zone Mail because of
privacy reasons
- If a student has received 2 doses but not yet met their 14 day waiting
period, they are still being approved.
- You are being asked to upload the documents before their registration
appointment.  Students get a 5-day notice
- Non-vaccinated students OK for on-line classes
```

ITS Total Cost Ownership

```
- One of our goals
- Model for funding IT in an organization.  Our situation is funding part of
the department.  Those things that would grow with the bond program.
- There is more to the cost of equipment than just its purchase.  The model
is there to account for the cost of growth.
- Approved by the board in conjunction with maintenance and operations TCO
- Grounded in the Gartner group - reputable organization
        - http://districtazure.clpccd.org/tech/files/docs/planning/tco-plan-
2017.pdf
- Based on Stuff instead of services
- If redone, a distance education component is needed
- 2016: $2.3 million in server costs
- 2016: $4.6 million in Desktop/Laptops costs
        - Big increases because of COVID and new buildings
- Smart Classroom growth: 246% Chabot, 542% LPC (2008 to 2016)
```

Email

– Our Barracuda servers will now point to our cloud servers allowing us to shut-down our local servers
– False junk mail reports will be reduced because of this
– Cutover will be transparent to users

Guided Pathways

– CRM Recruit is now running in production
– CRM Advise was presented on Flex Day. Contract is a SAS and signed off on. Implementation beginning in early 2022. A lot of configuration is needed, so collaboration and input is needed from all areas.

College Technology News/Updates

LPC

– Converting classrooms for HiFlex
– Update to dial-out on our phone system (must include the area code to anywhere)
– Web:
        – Spring 2022 COVID page is now live with FAQ's for students.
        – Student Success site for students is also live.   – Converting all google forms to MS Office 365 forms.

Chabot

– Chabot go app is now live for both iOS and Android platforms. Getting content creators for opt-in channels. Trying to bring all services into a single device. Nearly everything links to existing web pages reformatting them to be mobile friendly. Library and Classweb do not behave nicely with the App, so it just opens it up in the browser.
